360Logic

Enterprise-Wide Cybersecurity & Technology Delivery Excellence

Strengthening security, identity, and compliance across DoD, Federal Civilian, Aerospace, Financial Services, Healthcare, and Energy/Utilities sectors.

Corporate Overview

360Logic LLC is a **Veteran-Owned Cybersecurity and Identity Engineering Firm** providing **Identity & Access Management (IAM)**, **Vulnerability Management**, **Security Automation**, and **Detection Engineering** solutions across **federal, financial, and energy infrastructure** sectors.

We specialize in comprehensive IT, cloud, and management consulting services designed to enhance your cyber resilience and drive measurable value through automation and data-driven governance. Our mission is to help organizations strengthen their identity fabric, enhance cyber resilience, and achieve measurable value through automation, data-driven governance, and continuous improvement.

Core Competencies

✪ **Enterprise Vulnerability Management Leadership** – Direct and mature end-to-end vulnerability programs across cloud, on-prem, and hybrid environments, aligning with NIST, NERC, FedRAMP, PCI, and HIPAA requirements.
✪ **Project Planning and Coordination** – Execute complex cybersecurity and technology projects through structured planning, resource alignment, and milestone-driven delivery.
✪ **Elicitation and Analysis of Business and Data Needs** – Collaborate with stakeholders to capture functional, data, and security requirements supporting enterprise transformation.
✪ **Data and API Strategy and Execution** – Develop secure integration strategies leveraging APIs and automation frameworks for interoperability and efficiency.
✪ **Roadmap Definition and Evolution** – Define technical and organizational roadmaps aligning Zero Trust, IAM, and cloud modernization initiatives with mission objectives.
✪ **Project Transparency and Status Reporting** – Deliver executive-ready dashboards, KPI tracking, and progress reports to ensure visibility and accountability.
✪ **Governance, Compliance, and Risk Management** – Implement frameworks aligned to NIST, FedRAMP, HIPAA, PCI, and ISO 27001 to manage operational risk and maintain audit readiness.
✪ **Critical Path, Dependency, and Impact Analysis** – Identify and mitigate constraints impacting timelines, dependencies, and interagency coordination.
✪ **Strategic Communications** – Translate complex technical outcomes into clear, actionable messages for executive and operational audiences.
✪ **Scope and Organizational Change Management** – Facilitate adoption of new technologies and security controls while minimizing disruption to mission-critical operations.
✪ **Meeting and Workshop Facilitation** – Lead cross-functional meetings, workshops, and technical deep dives to drive alignment and decision-making.
✪ **Jira Administration and Agile Delivery Management** – Configure and manage Jira workflows to support sprint-based delivery, automation, and team performance tracking.

Differentiators

- **Multi-sector expertise: DoD, Federal Civilian, Aerospace, Financial Services, Housing, Healthcare, and Energy/Utilities**
- **Full lifecycle delivery:** From architecture and design to deployment, automation, and audit reporting
- **Advanced scripting and automation proficiency** (Python, PowerShell, SQL, YAML)
- **Deep IAM/PAM/Federated specialization** with enterprise-grade integrations experience.
- **Disabled Veteran-owned small business (DVOSB)** with 17+ years of combined military and civilian cybersecurity leadership
- **Audit-ready operations:** Ensuring SOX, NIST, PCI, HIPAA, and FedRAMP compliance

---

Past Performance

Department of Defense (DoD)

- **Supported secure operations and privileged access governance within cleared environments under DoD frameworks.**
- **Implemented PAM solutions integrating CyberArk and AD to enforce least privilege across IT/OT assets.**
- **Automated credential management, compliance reporting, and Zero Trust adoption aligned with DoD and NIST 800-53 controls.**
- **Delivered risk-based dashboards to leadership, providing visibility into mission-critical systems and audit readiness.**

Federal Civilian Agencies

- **Led NIST, FISMA, and FedRAMP compliance modernization initiatives across multi-cloud environments.**
- **Architected vulnerability management and detection automation using ServiceNow, Splunk, and Tenable platforms.**
- **Built Power BI and SQL reporting systems to consolidate compliance evidence, improving audit efficiency by 40%.**
- **Guided Zero Trust implementation, integrating CyberArk, Okta, and Sentinel for centralized identity risk management.**

Aerospace Industry

- **Directed enterprise-wide patch automation and compliance monitoring, reducing exposure by 84%.**
- **Developed Splunk dashboards and SolarWinds telemetry to monitor system performance and regulatory compliance.**
- **Delivered secure DevOps practices including CI/CD integration for security validation and continuous audit alignment.**
- **Established Security Champions training programs to upskill engineers in vulnerability and risk management.**

Financial Services

- **Designed and deployed enterprise PAM architecture integrating CyberArk, Okta, and Splunk to enhance compliance.**
- **Built automation pipelines using Python and PowerShell to streamline vulnerability correlation and reporting.**
- **Integrated CI/CD security scanning with Prisma Cloud, Tenable, and DAZZ to enforce continuous compliance.**
- **Created executive dashboards to track remediation metrics, risk trends, and SLA adherence across cloud and on-prem assets.**

Healthcare Sector

- **Delivered IAM and access control solutions ensuring HIPAA and SOX compliance across hybrid infrastructure.**
- **Automated account onboarding, evidence collection, and privileged session monitoring with CyberArk and ServiceNow.**
- **Hardened network and endpoint configurations, achieving measurable improvements in audit scores and access control.**
- **Established Power BI-based dashboards for real-time audit evidence and compliance visualization.**

Energy and Utilities

- **Guided NERC CIP compliance programs and Zero Trust adoption across operational technology (OT) and cloud systems.**
- **Integrated Nessus, Tripwire, Splunk, and Sentinel for continuous monitoring of critical infrastructure environments.**
- **Engineered secure data pipelines and automated validation workflows for audit-ready asset tracking.**
- **Enabled AI-enhanced risk analytics via UEBA and identity-based threat detection for proactive defense.**
